AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

- 1 Claim 1 (currently amended): A foldable mobile 2 communication terminal comprising:
- an upper case including a control processing section,
- 4 a display, a RF communication section, an I/O connector
- 5 section and a vibrator section of which corresponding
- function blocks are mounted on a hard board; and
- 7 a lower case including a key operation section and a
- 8 battery of which corresponding function blocks are mounted
- on a key board,
- wherein the key board arranged and accommodated in the
- 11 lower case is a flexible board,
- 12 wherein a battery terminal, a microphone, a key
- 13 diaphragm, and a LED for keys are all mounted on portions
- of one surface of the flexible board and said portions are
- 15 folded or turned down before storing the flexible board in
- 16 the lower case, and
- 17 wherein a battery terminal, a microphone, a key
- 18 diaphragm, and a LED for keys are all mounted on said
- 19 folded or turned down portions of the flexible board.

- 1 Claim 2 (previously presented): A foldable mobile
- 2 communication terminal according to claim 1,
- wherein the display arranged and accommodated in the
- 4 upper case comprises a liquid crystal display,
- wherein a menu selecting section for selecting a menu
- 6 by navigating through a menu system displayed on the
- 7 display is disposed in the vicinity of a lower side of the
- 8 display.
- 1 Claim 3 (previously presented): A foldable mobile
- 2 communication terminal according to claim 1,
- wherein the flexible board shares its use as a
- 4 connecting board for connecting the upper case and the
- 5 lower case.

Claim 4 (canceled)

- 1 Claim 5 (previously presented): A foldable mobile
- 2 communication terminal according to claim 1, wherein a
- 3 microphone section is mounted in an inclined state on a
- 4 lower side of the lower case at a position close to a
- speaker's mouth so as to receive a sound from the speaker
- 6 directly while in use.

- 1 Claim 6 (previously presented): A foldable mobile
- 2 communication terminal according to claim 1, wherein a view
- 3 port is provided on the lower case whereby displayed
- 4 contents on the display can be seen in a folded state.
- 1 Claim 7 (previously presented): A foldable mobile
- 2 communication terminal according to claim 6, wherein the
- 3 view port is disposed between the microphone and the key
- 4 operation section.
- 1 Claim 8 (original): A foldable mobile communication
- 2 terminal according to claim 6 or claim 7, wherein a
- 3 transparent plate is mounted on the view port.
- 1 Claim 9 (original): A foldable mobile communication
- 2 terminal according to claim 8, wherein the transparent
- 3 plate is given a lens function.
- 1 Claim 10 (previously presented): A foldable
- 2 communication terminal according to claim 1, wherein a
- 3 portion of the upper case and the lower case in the
- 4 vicinity of a section being mechanically connected with
- 5 respect to each other is formed in a narrower configuration
- 6 than a remaining portion.

- 1 Claim 11 (currently amended): A foldable mobile
- 2 communication terminal comprising:
- an upper case including a control processing section,
- 4 a display, and a RF communication section of which
- 5 corresponding function blocks are mounted on a hard board;
- 6 and
- a lower case including a key operation section, a I/O
- 8 connector, and a vibrator and the battery of which
- 9 corresponding function blocks are mounted on a key board,
- wherein a flexible board is used as the key board
- 11 arranged and accommodated in the lower case,
- wherein a battery terminal, a microphone, a key
- diaphragm, and a LED for keys are all mounted on portions
- 14 of a same surface of the flexible board and are folded or
- turned down before storing the flexible board in the lower
- 16 case, and
- 17 wherein a battery terminal, a microphone, a key
- 18 diaphragm, and a LED for keys are all mounted said folded
- or turned down portions of the flexible board.
- 1 Claim 12 (previously presented): A foldable mobile
- 2 communication terminal according to claim 11,
- 3 wherein the flexible board shares its use as a
- connecting board connecting the upper case and the lower
- 5 case.

Claim 13 (canceled)

- 1 Claim 14 (previously presented): A foldable mobile
- 2 communication terminal according to claim 11, wherein a
- portion of the upper case and the lower case near a section
- 4 being mechanically connected with respect to each other
- 5 formed in a narrower configuration than a remaining
- 6 portion.

Claims 15-18 (canceled)
